

Perlman Emergency Fellowship
NorthShore Health System
Syllabus: GU/Renal Module

- Length: Didactic hours: _____
Lab hours: _____ (includes sim lab, journal club, radiology time, etc)
Clinical hours: _____
- Faculty: R. Gimbel,
Alison Ruiz PA-C, Program Director
Joey Davidson, MD, Simulation Fellow
- Course Description: This emergency medicine fellowship module will present content and skills related to GU seen in the ED, with an emphasis on men's health conditions. These conditions will include selected traumatic injuries, infectious, inflammatory and other conditions. The current guidelines for the diagnosis and treatment of STIs are presented in the OB/GYNE module, however when appropriate STIs will be presented as they specifically relate to the male ED patient. Special considerations applicable to certain patient populations including children and the elderly will be presented.
- Course Outcomes:
1. Identify and manage potentially serious GU infections and non infectious conditions presenting to the ED
 2. Demonstrate appropriate assessment and management of the patient presenting with GU trauma
 3. Demonstrate the appropriate diagnostic evaluation and management for the patient with renal calculi
 4. Interpret diagnostic studies correctly, such as testicular US, and renal imaging
- Teaching methods: Didactic lectures/discussions, case studies, assigned readings, and other materials as assigned. Participation in simulation and other lab experiences. Precepted clinical hours.
- Evaluation:
1. Weekly meeting with fellowship director to include discussion of exemplar case from clinical experiences
 2. Simulation case study with evaluation
 3. Evaluation of clinical preceptor
 4. Evaluation of clinical procedures log
